1414	THOR	S	Nem	PS2	<b>Commercial Bulk</b>	PS3	<b>Commercial Bulk</b>	S	Breeder's seed

All newly listed varieties (PR1/PS1) have results from three years using 1 to 2 kg of breeders' seed. Thereafter commercial seed is used from bulks of 500 units or more for RL varieties or 200 units or more for DL varieties. Data obtained using seed from commercial seed bulks is identified in the table in bold. R and S varieties have normally been tested with seed from commercial bulks for three years but there are exceptions and these are noted in this table.
