

DRILLING FOR BETTER ESTABLISHMENT AND IMPROVED CROP PERFORMANCE

A successful sugar beet harvest begins with the preparation of the seed bed and ensuring optimum performance of both drill and operator. Good crop establishment helps to produce healthy uniform plants, improving yield and profitability.

The course is open to all sugar beet drill operators and contractors, providing the basic principles of drill set-up for all models.

Sessions to include:

- Practical soil management
- Cultivation techniques for the perfect seed bed
- Pelleting and seeds
- Drill maintenance for optimum performance

The course will start at 08:30 and come to a close at 13:00. Refreshments will be provided.
