

**EMERGENCY AUTHORISATION FOR A PLANT PROTECTION
PRODUCT**

PLANT PROTECTION PRODUCTS REGULATION (EC) No 1107/2009

Extent of authorisation: England

Product name: Movento

Active ingredient: 150 g / l spirotetramat

MAPP number: 18435

Product authorisation holder: Bayer CropScience Limited (Registered Company
no. 218826)

Marketing company: Bayer CropScience Limited

This Emergency Authorisation, for the specific use set out in this notice only, ends:

- (a) for placing on the market and use of stocks:
16 September 2023
- (b) for storage and disposal of stocks: 16
October 2023

This Emergency Authorisation will be withdrawn or amended before its end date if a decision is taken to withdraw or amend this Emergency Authorisation under Regulation (EC) No 1107/2009 on any other grounds.

HSE Digital Signature

This and the attached Appendices 1 and 2 are signed by the Health and Safety Executive for and on behalf of the Secretary of State.

Date of issue: 19 May 2023

EXPLANATORY NOTES

1. This is Emergency authorisation number 1209 of 2023.
2. This Emergency authorisation will be published on HSE's website.
3. Application reference number: COP 2023/00265
4. Persons using the product to which this Emergency authorisation applies should acquaint themselves with and observe all requirements contained in the Regulation (EC) No 1107/2009, including the duty on the holder of any Emergency authorisation to notify information on potentially dangerous effects, a contravention of which is a criminal offence under those Regulations.
5. Neither the efficacy nor the phytotoxicity of the product for which this Emergency authorisation has been granted has been assessed and, as such, the user bears the risk in respect of failures concerning its efficacy and phytotoxicity.
6. In this notice Regulation (EC) No 1107/2009 means:
In relation to Great Britain, Regulation (EC) No 1107/2009 as it has effect in Great Britain.

ADVISORY INFORMATION

This Emergency authorisation relates to the use of 'Movento' (M18435) for the control of peach potato aphid (*Myzus persicae*) to prevent virus yellows infection. Applications to be made via horizontal boom sprayer in water volumes of 300 to 600 litres water per hectare. 'Movento' should be applied at the recommended rate of use and in sufficient water volume to achieve the required spray penetration into the crop and uniform coverage necessary for optimal pest control.

IMPORTANT: When applying this product under the terms of this Emergency authorisation, comply with any resistance guidance or restrictions stated on the product label.

Total reliance on one pesticide will hasten the development of resistance; pesticides of different chemical types or alternative control measures should be included in a planned programme. Alternating insecticides with different modes of action is a recognised anti-resistance strategy and 'Movento' should be used in alternation with insecticides of a different mode of action, giving consideration to the overall treatment programme on the crop against a range of pests.

This Emergency Authorisation will expire on 16 September 2023.

REPEAT APPLICATIONS

For any returning application the following data requirements must be addressed:

1. A summary report (in tabular form) which demonstrates how the authorisation requirements were met as detailed in the covering letter and including:
 - Dates and area of application at each location
 - Reasons to spray with Movento
 - Aphid counts
 - Beet yellows virus infection levels
 - Yield

2. In order to support a standard authorisation for use of spirotetramat on sugar beet, the following data requirement should be met:
 - Data from 8 residue trials conducted at the proposed GAP on sugar beet.

Reduced data sets of trials may be applicable if the intended use gives rise to residue levels <LOQ (limit of quantification) or a zero residue situation in sugar beet roots and tops. In the latter case the zero residue situation must be fully supported on the basis of the available plant metabolism data.

APPENDIX 1: CONDITIONS OF EMERGENCY AUTHORISATION

The conditions below are obligatory. They must be complied with when the use occurs. Failure to comply with the following conditions will result in the withdrawal or amendment of the Emergency Authorisation under Regulation (EC) No 1107/2009 and may result in other enforcement action, including prosecution.

Use:

Field of use: **ONLY AS AN INSECTICIDE**

User: Professional

Crops/situations:	Maximum individual dose: (litres product / ha)	Maximum total dose: (litres product / ha / crop)	Maximum number of treatments:	Latest time of application:
Sugar beet	0.5	0.5	-	Up to and including sixteen true leaf stage (BBCH 39)

Operator Protection:

- (1) Engineering control of operator exposure must be used where reasonably practicable in addition to the following personal protective equipment:

Operators must wear suitable protective clothing (coveralls), suitable protective gloves and face protection (faceshield) when handling the concentrate.

- (2) However, engineering controls may replace personal protective equipment if a COSHH assessment shows that they provide an equal or higher standard of protection.

Environmental protection:

To protect non-target arthropods respect an untreated buffer zone of 5 m to non crop land.

Other specific restrictions:

- (1) This product must only be applied for the control peach potato aphid (*Myzus persicae*) in accordance with the terms of this Emergency Authorisation, the product label and/or associated leaflet.
- (2) Growers must refer to BBRO advice and recommendations from BASIS qualified agronomists when considering the need to spray.
- (3) Do not use on sugar beet plants grown from seed treated with 'Cruiser SB'.
- (4) This product must not be applied via hand-held equipment.
- (5) Crops must only be sprayed with 'Movento' following a two spray programme of acetamiprid and flonicamid and where relevant aphid thresholds* are identified.

Up to 12 true leaves: 5 green wingless aphids per 20 plants.

Between 12 and 16 true leaves: 1 green wingless aphid per plant.

APPENDIX 2: GENERAL CONDITIONS FOR AN EMERGENCY AUTHORISATION

Failure to comply with the following conditions will result in the withdrawal or amendment of the Emergency authorisation under Regulation (EC) No 1107/2009 and may result in other enforcement action, including prosecution.

Adverse effects:

The authorisation holder must immediately notify the Secretary of State if they have any new information on the potentially adverse effects of the authorised product, or of residues of an active substance in that product when used in accordance with the conditions of this authorisation. Failure to comply with this requirement is an offence.

Provision of information:

The authorisation holder must comply with all requests for information required by, or on behalf of, the Secretary of State in accordance with Regulation (EC) No 1107/2009.
